

Storax Racking Supplies

Storax Racking Supplies was established in May 2003 following the unexpected demise of Dexion Ltd. Our primary intention was to provide a Speedlock Mk3®-compatible product to service the thousands of companies who suddenly had no reliable source for spares, repairs and add-ons to their warehouse racking.

Today Storax Racking Supplies and Storax SP80 racking are well-established names with an impressive and growing portfolio of trade dealers and end users who specify Storax SP80 as their system of choice for all of their pallet racking requirements.

Half of the Supplies team are engineers who have all previously worked with one or more of the main UK manufacturers before joining us. This pedigree provides a well-rounded understanding of the industry, while the team's combined skills cover production-, technical-, quality- and customer-facing functions. The team jointly offers more than a century of relevant experience.

We take the matter of providing 'good old-fashioned service' very seriously. We understand that people want to speak to somebody who understands what they want and can deliver accurate, timely information. That's why we always staff the office as a minimum between the hours of 8.30am – 5.30pm, Monday – Friday.

We strive to respond to quotation requests within 48 hours. We aim to confirm all purchase orders back within 48 hours of receipt, too. We make no demands about how much our trading partners buy from us, or how often. We don't have preferential discounts for 'pet' customers. Simply put, we believe in treating people how we like to be treated ourselves.

For more information about SP80 and its compatibility with Speedlock Mk3® please see our 'Product Compatibility' page.
